

TRN1

Designed with galvanized steel cable of Ø6.3mm, to descend or promote a person to confined spaces.

It has automatic safety brake and locks in case of release of the lever to prevent an uncontrolled descent of the user.

The rescue lathe should be used in conjunction with a retractable lifeline (EN 360) to become a lifeline system.

Norm	EN 1496 B	
Weight	14,50 KG	
Cable length	20M	25M
Maximum load	140 KG	
Mechanical Advantage	5:1	

Materials	
Handle	Plastic
Cable	Galvanized steel
Case	Plastic
Body	Steel
